## 6X6 SHEFFIELD STANDARD

- 1 in. x 1 in. rails
- $5 / 8$ in. pickets / $1-5 / 8$ in. picket spacing

SOS\#
Panel and Gates
A 6x6 Sheffield Standard Panel
B $6 \mathrm{ft} . \times 4 \mathrm{ft}$. Sheffield Standard Straight Gate*
C 6ft. x 4ft. Sheffield Standard Arched Gate*

| G | $2 \mathrm{in} . \times 2 \mathrm{in} . \times 106 \mathrm{in}$. Gate Post | 73002400 |  |
| H | $2 \mathrm{in} . \times 2 \mathrm{in} . \times 106 \mathrm{in}$. Blank Post | 73002392 | 384529 |

## How to calculate fence materials:

1. Determine total number of lineal feet and subtract footage for gates
2. Calculate \# of fence panels needed: Total lineal feet divided by panel width (feet) = total \# of panels
Note: panels can be cut to shorter width if necessary
3. Calculate \# of posts needed:

- 1 post per panel + 1 end post to end the fence run
- 1 end/gate post per gate (don't forget 2 post inserts for each gate)

## Key:

- Line posts - use when connecting fence panels in a straight line
- Corner posts - use when connecting fence panels at a 90 degree angle
$\square$ End posts - use when ending a fence run

Check with local building department for code requirements

- Gate posts - use on the hinge side to support the weight of the gate
- Fence panels
\ Gate
